

389 patients randomized!

We are delighted to announce 389 patients have been randomized to phase 2 of the trial since commencement.

Congratulations to all sites on their hard work and dedication in recruiting over the last 5 months.

It will be important to hit the Christmas recruitment target of 400 patients due to the delay in starting the trial. Weekly updates are circulated every week with recruitment progress and targets.

Version Control Check

Please make sure you are using the most up to versions of forms and older versions have been marked as superseded.

Document	Version	Date
Protocol	V7.0	21 Oct 15
CRF	V4.0	03 Nov 16
Evidence forms	V4.0	11 Jul 16
Manual of operations	V1.0	31 Mar 16
